

In-class Project Presentation Logistics

Interactive AI 2025Fall, In-class presentation, Dec 25, 9:50-12:15 am

The project presentations will take place during our final lecture on December 25th. The goal is to clearly communicate your ideas to your classmates, highlighting what interests you, what you have accomplished, and the insights you gained throughout the course project. Please see the logistics below.

Presentation Time & Format

- Each team will have a 7-minute total slot.
- Recommended structure:
 - 5-6 minutes – Presentation
 - 1-2 minutes – Q&A with instructors and classmates. Due to the time limit, there may only be 1 or 2 questions.
- Please rehearse your talk to ensure it fits within the allotted time. We will strictly enforce the 7-minute cap to keep the session on schedule.

Logistics on Presentation Day

- Before the presentation, please upload your slides to this folder: <https://cloud.tsinghua.edu.cn/u/d/39cc9d1bcf3242828e7a/>. We will use one laptop for the presentation.
- The instructor will arrive 10 minutes before the lecture, and you may test your slides in advance.
- We will follow the presentation order listed in this doc: https://uvmvuvu6qp6.feishu.cn/wiki/NYdzwpN2Hivf1ckOFqxcWBQvnce?from=from_cpylink
- **[Important!]**
 - Each team is required to ask at least one question to another team. The question may be a clarification question or any constructive question related to the presentation.
 - Please record your asked question in the above form using the following format: [Question to Team X: ...], where X is the presentation order.
- While the previous team is answering questions, please get ready and wait in line for your turn.

Presentation Content Guidelines

- Your presentation should clearly communicate:
 - Problem Statement: What task are you addressing, and why it matters.
 - Related Literature: What is the state-of-the-art.
 - Technical Approach: Key methods, algorithms, or system components.
 - Experiments & Results: Highlight core findings, evaluations, or demos.
 - Key Insights: What worked, what didn't, and what you learned.
 - Future Work: What could be extended or improved.
- Try to balance the depth (detailed math or code) and the clarity.

Submission after the presentation

- Please upload your final slide deck to Web Learning (网络学堂).

- Submission deadline: Dec 25, 11:59 pm.
