

Final Report Logistics

Interactive AI 2025Fall, In-class presentation, Jan 11, 11:59 pm

The final report is intended to comprehensively document your course project, including your problem formulation, technical approach, experimental results, and key insights. It should reflect both the outcomes of your work and your understanding gained throughout the project. Please see the logistics below.

Report Format & Length

1. Length recommended: 4-6 pages (excluding references)
2. Format: PDF format; Use a standard academic layout (e.g., NeurIPS / ICLR style, or a clean single-column format)
3. Language: English

Report Content Guidelines

Your final report should clearly include the following components:

1. Project name and team member
2. Introduction & Problem Statement
 - Clearly define the task/problem you address
 - Explain why the problem is important
3. Related Work
 - Summarize key prior work and state-of-the-art methods
 - Clarify how your project relates to or differs from existing approaches
4. Technical Approach
 - Describe your core ideas, methods, models, or system design
 - Provide sufficient technical details for clarity and reproducibility
5. Experiments & Results
 - Experimental setup, datasets, and evaluation metrics
 - Quantitative results, qualitative examples, or demos
 - Clear figures and tables with proper captions
6. Key Insights & Discussion
 - What worked well and what did not
 - Analysis of results and expected/unexpected findings
7. Limitations & Future Work
 - Current limitations of your approach
 - Potential extensions or improvements
8. Conclusion
 - Summarize the main contributions and takeaways
9. References
10. Task allocation among team members

Submission Instructions

- Please upload your final report (PDF) to Web Learning (网络学堂).
- Pack your codes and demo, and upload them at <https://cloud.tsinghua.edu.cn/u/d/0f9ed9f976e14715ae02/> in format of: [PresentationID]_[project name]_[Team Members].zip
(For example, 1_LLM_For_SVG_Generation_XiaoMing_XiaoHong.zip)

- Submission deadline: Jan 11th, 11:59 pm.
- Only one submission per team is required.

Important Notes

- The final report should be consistent with your final presentation, but may include additional technical details, experiments, or analysis that could not fit into the presentation time.
- Clear writing, logical structure, and proper citations are expected.
- Late submissions will follow the course late policy.
